

INSTRUMENT CATALOGUE

Surgical Line Instruments a well-known name in the field of dental, measuring & Calibration instruments since 1977. We are located in Sialkot, the industrial city of Pakistan. Renowned for its Medical Instruments, Leather Products & Sports Goods, Skilled labor of the Sialkot has the experience of two generation to make the steel into useful tools, now with the modern machinery and new techniques it become even more superior. Our products have a great reputation and competitive price in domestic and foreign market.

Materials

Surgical Line Instruments always selects the finest material. The material selected has the appropriate hardness and flexibility, including the highest grade of surgical steel. According to Surgical Line's point of view, instrument made with inferior material may be cheaper initially but will cost more in the long run.

Craftsmen

Surgical Line Instruments has its own in house makers who have inherited skills, which are further supported by latest approaches. These makers are specialized in different functions.

Design & Development

Surgical Line Instruments has its own designs for different instruments. The design and development activity of all these instruments is carried out following the design and development clause of ISO 9001:2008

Quality Control

Keeping in view the nature of instruments, Surgical Line Instruments has applied quality checks to ensure that only the finest quality is produced. Strict measures are taken right from the forgings to final approval.

Patterns Consistency

Surgical Line Instruments hundred percent quality control specialized workforce and use of precise machine tools make it possible that all instruments will be consistent in shape and size year after year. Company Profile: The Company is involved in the manufacturing activities, now has decided to plunge into export business.
